Installation

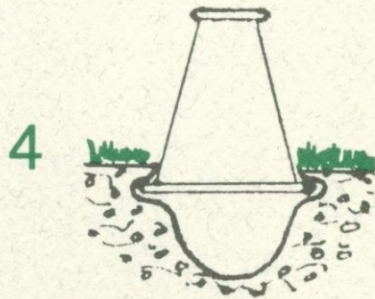

1 Place your BARDMATIC™ on the spot selected. With a spade or shovel, mark the outside diameter of the BARDMATIC™ and then place the unit to one side.

2 Dig out the circle you have just marked to a depth of approximately 4" - 6".

3 Leaving a ring about 4" wide on the outside, dig out the centre of the hole as deep as possible. This depth will vary with soil conditions, but it should be a minimum of 12". If you do not intend to use the compost for your garden, dig as deep as you can.

4 Sit your BARDMATIC™ on the step and backfill the soil solidly around the BARDMATIC™. This will anchor the unit in place. It is now ready for use.

Emptying the Compost

- STEP 1 – Dig around the BARDMATIC™ so you can lift the cone straight up leaving a cone of compost.
- STEP 2 – Lay the BARDMATIC™ right beside the pile remaining.
- STEP 3 – Shovel the material which has not yet decomposed back into the cone.
- STEP 4 – Shovel your compost away.
- STEP 5 – Tip your BARDMATIC™ back into position and backfill with dirt.

Specifications

Top Diameter – 13"
Bottom Diameter – 31"

Overall Height – 39"
Approx. Weight – 12 pounds

Happy Composting!
